Dear Larry:

I just wanted to tell you how wonderful our experience was with Jimmy Webb yesterday. It was one of the best evenings of entertainment that we have presented in several years. Our near capacity crowd hung on every word and every note and expressed their delight with several rounds of thunderous applause. I have had more positive feedback from people after the show last night and today than any show during my time here.

He was excellent with our students during an afternoon discussion and question/answer session. He was gracious with his time and most helpful with his talk and advice. Several are aspiring songwriters while others are looking to get into the music business as managers, recording engineers and other positions. His time with all of the student group gave them inspiration as well as practical information.

It is a pleasure to work with you and the quality artists on your roster. I look forward to working with you again in the future.

Sincerely,

Jeffrey Clark
Executive Director
